

# Supporting forest science curriculum

Hi, Kae

These stories are wonderful.

I can relate to one of the stories in which a participant at the SLT GP meeting asked why the LTCC doesn't have forestry in the curriculum. I've given numerous talks at the Tahoe Issues Class over the years. They used to have a wilderness program that was much more hands-on. I think there's definitely interest among the agencies in the basin with forestry expertise to assist with educating students on forest science, but that would have to come with the hiring of a professor or even an instructor.

Cheers!
