Road construction in Nevada

Some people say winter and road work are the two seasons in the Lake Tahoe region. Both are going on this week.

The northbound lanes of Highway 395 north of Jacks Valley Road are being widened. Expect delays during the week through October.

The highway will be reduced to one lane at night through May 21.

Kingsbury Grade on the Tahoe side will also be down to one lane during the day. That will be for just this week.
