Plans for the HGTV Dream Home 2014 are well under way in Truckee.

The HGTV Dream Home 2014 is a custom-built, fully furnished home set in the Schaffer's Mill community, with panoramic views of the mountains.

The 18th annual HGTV Dream Home is part of a grand prize package that will be awarded in March 2014. The official HGTV Dream Home Giveaway entry period will open in December 2013. Until then, information about the home's location and features will be available online

as it emerges.

The 3,200-square foot home, under construction by Tanamera Construction, has three bedrooms and 3½ baths on one-third of an acre. Ward-Young Architecture blends traditional and contemporary forms. The house is designed with two wings: a living wing and bedroom wing with large expanses of glass and sliding door systems to create a transparent and direct

connection between indoors and outdoors.
