

Mount Aukum bridge work to cause delays

This week El Dorado County will begin rehabilitation of the deck and walkway of the Mount Aukum Road Bridge at the North Fork of the Cosumnes River. The rehabilitation process requires closure of one lane of the bridge.

This closure will be in effect through May.

The work will affect the northbound and southbound lanes of Mount Aukum Road at different times. To facilitate traffic movement across the bridge, temporary traffic signals will be installed at both ends of the bridge. These signals will allow one-lane with alternating one-way traffic to move across the bridge. Portable changeable message signs will be in place to advise approaching motorists of the exact date of closure.

Questions regarding the project or the lane closures should be directed to Monika Pedigo at 530.621.5954 or monika.pedigo@edcgov.us.
