

Barton accepting health grant applications

Barton Health has \$25,000 to give out in grants to organizations that help the underserved populations and have a lasting impact on the community's well-being.

Barton Health will fund programs that address South Lake Tahoe community's most pressing health needs – substance abuse, access to healthcare and mental health.

The objective is to fund projects that serve a large portion of the South Shore community. In past grant cycles, between five and ten organizations were selected.

The deadline to apply is June 27. Grantees will be notified in September and grants will be awarded at the National Philanthropy Day celebration on Nov. 7.

Funding for Barton Health Grants is provided by Barton Health through donations from the Barton Foundation.

Grant applications and details are available online.
