

Online service helps SLT residents interact with city

South Lake Tahoe Public Works Department has launched of a web-based service portal to allow anyone to add service requests, concerns, or issues that need to be addressed by city engineering, streets-transportation, and/or facilities department.

Simply go **online** to submit a request.

The purpose of the portal is to expedite community requests, concerns or issues.

The asset management component allows the city to track asset conditions, prioritize risk, forecast capital budget needs and create and manage capital projects.
