

FALLEN LEAF LAKE/ ANGORA RIDGE TRAIL PROJECT

PROJECT DETAILS:

1. (2017) New construction of a 2 mile long, 24" wide shared use trail starting near the intersection of Fallen Leaf Lake Road and Emerald Bay Rd. traversing uphill before connecting at the bottom of Angora Ridge Rd.
2. (2017) New construction of a 2.5 mile long, 18" wide shared use trail running the full length of Angora Ridge. This trail will provide separation from the road for non-motorized users.
3. (2017) New construction of a 1.5 mile long, 18" wide shared use trail connecting Angora Ridge to the trail network near Mule Deer Court.
4. (Date TBD) Reconstruction of the "rock Garden" trail running from HWY 89 south parallel to Fallen Leaf Road. This trail currently a non-system trail and will be adopted by the Forest Service.
5. (Date TBD) Adopt and upgrade user trails around Fallen Leaf Lake, in many cases the trail width will be narrowed and alignments will be adjusted to provide better connections and sustainability.
6. (Date TBD) New Trail connecting from Angora Lakes via the existing "Church Trail" to Lily Lake. This is steep and rocky terrain and will likely be the most difficult trail to build in this project.
7. New multi-use trail connecting Fallen Leaf Lake to the end of the paved bike path at Spring Creek Road

MAP LEGEND

- LTBMU Trails (Existing)
- Existing Road
- Stream (Perennial)
- Adopt & Upgrade Trail (Date TBD)
- New Trail (Potential 2017 Build)
- New Trail (Potential 2018-19 Build)

- Basic Ownership**
- COUNTY
 - PRIVATE
 - STATE
 - USDA FOREST SERVICE
